

Live Instructor-led Online Course **5D BIM using Navisworks**

CADD Centre offers training on 5D BIM using Navisworks in various course categories such as Essentials, Professional, and Expert. Essentials are basic training programs, whereas courses offered under Professional and Experts are extensive and advanced. If you are a company or an institution, we can also offer customized courses to meet your specific learning requirements.

About 5D BIM and Navisworks

5D BIM refers to the intelligent linking of individual 3D CAD components or assemblies with time schedule (4D BIM) constraints and then with cost-related information.

Navisworks is used to estimation and cost planning involved in pre-construction, and construction activities. It is also used in construction schedules and logistics. The software enables greater coordination, construction simulation, and whole-project analysis. Navisworks comes with advanced simulation and validation tools that are used to explore new ways of providing efficient designs.

What will you learn?

To create budgets based on different costs such as material cost, labor cost, equipment cost, and subcontractor cost.

To create cost loaded schedules.

To provide multiple and iterative estimates.

To review models and create model-based estimation.

To track schedules.

To create timelines.

Course Fees: USD 225

Payment Details : 100% Advance payment to be done.
